

L50 - Lab 5, Reproducing An Experiment

Dr Noa Zilberman, Dr Andrew Moore

Michaelmas, 2017/18

In this lab you are requested to reproduce one of your peer's experiments, and to provide feedback on the experience.

The feedback will be submitted using the following online form: <https://goo.gl/forms/eCZmJjJ87Vm0TcZS2>

You will be reproducing the experiments on your own setup (i.e., same VMs as you are currently using). This means that (for example) the experiments from Setup #1 will be reproduced on the VMs of Setup #2.

You should allow no more than 2 hours to reproduce the experiments - i.e., ideally you will complete it during the lab on Friday. As the ideal case is usually far from reality, I request that you submit the feedback no more than a week from the lab. The due date for form submission is **17/11**.

We encourage you to submit the feedback earlier, to allow your peers to improve their experiments. You will receive the feedback to your own experiment after you have submitted your feedback (assuming the feedback to your experiment was already submitted, else it will be sent to you as soon as it is submitted).

Please use the feedback that you receive to improve the quality of your methodology and experiments toward the final submission.

Note that the second report submission is also through Moodle, and that all supporting materials (e.g., results, scripts etc) should be enclosed and uploaded to Moodle as well. Please refer to Lab 4 handout for detailed instructions.
